

Laser Combat

The Laser Combat field is located at the Outdoor Activity Centre.

The field is fully accessible for spectators, although the terrain may prove difficult for wheelchairs. The activity would not allow wheelchair bound participants due to natural ground and debris.

The nearest accessible toilet is located in the Outdoor Activity Centre building.

The course is accessible but in wet weather wheelchair removal of casualties may prove difficult.

Special needs participants may participate if prior arrangements are made with the department. The participating individual must be able to fully understand a safety brief. Prior consultation with the department will help determine the above criteria.

Pushchairs and babies are not to be allowed on the field.

Ambulance and paramedic vehicle access can be achieved via access road which in turn is accessed via the entrance from overflow car park.
