

## **Village Square Nature Trail (Inc a Wild Bird viewing area)**

Level access is gained from the main block paved footpath at Village Square. This then takes you onto a winding semi prepared path constructed of compressed stone and topped with fine stone/dust. Suitable width and surface for the use of wheelchairs & mobility scooters. Although not supervised, the trail is generally a one-way system and is approximately 100m in length. This trail also leads passed a wild bird viewing area which is a section laid to wood chippings and may be wheelchair challenging to traverse in. Viewing holes are installed at various heights. This section is optional & can be avoided if necessary. The main trail then exits back onto a level block paved footpath.

The closest accessible toilet is located at the Village Square, within Foresters Kitchen and Terrace.
