

Sports Cafe

This restaurant and bar is located within Sports Plaza and has level, open access from the main walkway.

A lift is available to the mezzanine floor in Sports Café (located between Starbucks and Sportique) providing access to the Aerobics Studio and the snooker and pool tables, with a ramp to the lower bar level.

A lowered counter area is available to the right hand side of the bar. If required, please make a team member aware and they will direct you to this point and ensure that you receive attention for your ease of service.

There are some fixed seats which are not easily accessible by wheelchairs. However, tables can be reserved for those wishing a specific request. Orders are normally taken at the table with the exception of during large sporting events.

Fully accessible toilets are available adjacent to Sports Café.

Noise levels within the restaurant can vary greatly especially when major sporting events are being shown in the restaurant.

Large print and Braille menus are available if required.

The patio area at the rear of Sports Cafe is provided with level access from Sports Cafe and ramped access is available to the path below that leads to the external play area.

The external play area floor is covered with wood chippings and may cause some difficulties for wheelchair accessibility. The rest of the surrounding area is a level patio and is accessible.

There is limited access to the internal play areas, due to space constraints and the foam based flooring.
