

Policy for the environment

Center Parcs recognises all its activities have an impact on the environment. This happens through its day-to-day operation, the development of villages, and its influence in the wider community.

Fulfilling this policy will embrace the core business value of creating an exceptional experience for our guests.

Commitments

The Environmental Management System will support the commitments to:

- *Establish a policy that is appropriate to the purpose of the organisation and context, including the nature, scale and environmental impacts of its activities, products and services;*
- *Continually improve its activities in order to reduce its environmental impacts;*
- *Review the company's environmental objectives and targets annually;*
- *Protect the environment including preventing pollution;*
- *Comply with all relevant environmental compliance obligations*

Carbon reduction

Center Parcs has a responsibility to manage its impact on climate change. It is committed to work in ways that minimise carbon emissions and reduce the company's carbon footprint.

The company will achieve this by monitoring energy usage and setting carbon emissions targets. In addition we are committed to building energy efficiency into our designs and investing in appropriate technologies.

Biodiversity

The diversity of life on our villages is fundamental to the experience we offer our guests. We are committed to protecting the wildlife on our villages and to enhancing their habitat.

Natural resources

Center Parcs is committed to reducing, as far as reasonably practicable, its use of natural resources and the volume of waste it produces.

Staff are empowered to manage the company's activities to lower the environmental impact.

Center Parcs will recycle as much as it is viable to do so.

Guests

Center Parcs will ensure that guests enjoy their short break in the knowledge that the company is managing its business in harmony with the environment. It will continue to develop guests' understanding of environmental issues.
